*Includes basic (non-extensive) knowledge of React, GraphQL, static site generators, Node.js, npm, Electron, MongoDB and (maybe) more

IN A NUTSHELL

Self-taught web designer, amateur graphic designer, etc.
Learning student above all.

Born in Boston, raised by Swiss parents. Fascinated by the concept of a computer and especially software since I was young. Also interested in graphic design and typography.

Today I like to mix both design and technology into what I do—you can't have the function without the form!

I have moderate experience with coding, frontend web design and development, as well as basic knowledge of 3D modeling and rendering, and 2D animation.

Past Work

see attached **portfolio** for images

Market 2day market2dayapp.com	Proposed a detailed application redesign for the Boston-based startup Market 2day.
Masks for Hunger masksforhunger.marmier.co	Built a website + set up CMS backend for a project to help fight hunger during COVID (now an archived project)
Amuni Coaching amuni-coaching.com	Built a website + set up CMS backend for an adolescent coach.
Organize organize.julianmarmier.com	Created an Electron app that organizes files in a simple and fast manner (work in progress)
